

Air Conditioning Systems For Armoured Vehicles

- Specialists in Defence applications
- Design, Development and Manufacture
- Quality approved to ISO - 9001
- Products deployed throughout the world

Gallay design air conditioning systems to meet the operating requirements of armoured and military vehicles.

The main requirements:

- To maintain crew and vehicle occupants in peak condition.
- To provide equipment tailored to match vehicle space restraints
- To offer alternative power options: direct engine drive; hydraulic drive, electrical and auxiliary power unit drive.
- To withstand shock and vibration to relevant military standards.
- To ensure no interference to communication systems to the relevant military standards.
- To integrate with NBC systems as required.
